

Product Specifications

Super Shallow Foundation Bollards (Model SS-800)

1. Crash tested and certified with ASTM M40/K8 (P1) rating.
2. Stops 15,000 lbs. vehicle at 40 MPH impact. Bi-directional stopping capability.
3. Requires only 4" excavation depth. Ideal for parking decks, basements, subways, or tunnels.
4. No tying, bolting, welding, assembly, or specialty subgrade required; allows for field adjustments.
5. Removable bollard available.
6. Easy to install with turns and across grade elevation changes.
