

Hornet

Shallow Mount Array Bollards
Model: SMB-400 / SMB-800

- Ideal for locations that require high security bollards but have limited foundation depth to work with.
- Traditional high-security shallow mount 3-bollard array.
- 12" and 13" deep foundations allow for installation where underground utilities prevent a traditional deep-mount bollard.
- Variety of decorative covers available.
- Removable Bollard available as an option.
