

Triton

Manual Bollard
Model: MR M30

- Ideal for store fronts, office buildings, pedestrian-friendly areas, stadiums, schools, and municipal buildings.
- Requires less than 35lbs to raise or lower; and may be locked in either position to allow or eliminate traffic flow.
- Easy to install with turns and across grade elevation change.
- Bollard retracts seamlessly into the foundation and becomes flush with surface.
- Bollard available in stainless steel finish.

ASTM F2656-15
