

# Avenger

Surface-Set Arms

Model: DACB-PAM-1200 S; DACB-PAM-1200 DS;  
DACB-ELE-1200

- Surface Set design allows for quick set up and avoids underground utilities. Ideal for Nuclear Facilities, Oil & Gas, or other critical infrastructure locations where foundation excavation is problematic.
- Electric and manual versions available. Manually operated Avengers requires less than 40 lbs. of lifting force to raise or lower barrier
- Electric Avenger has PLC controlled logic. Trigger loops and timers can be provided to meet traffic control requirements.
- Provides highly visible deterrent. Typical arm is painted Safety Yellow with retro- reflective striping & signs.
