

PREDATOR M50 ARRESTOR NET BARRIER

FEATURES

- Certified to stop a 15,000 lb vehicle at 50 mph (ASTM F2656-M50-P2)
- Deploys in under 2 seconds; ideal for final denial applications and high-risk access points
- Energy-absorbing design reduces risk by decelerating the vehicle and allowing the net to “give” on impact
- Bi-directional certified—crash-tested inbound and outbound to ensure full operational symmetry
- Fully customizable controls including wireless, networked, and programmable logic
- Optional battery backup supports barrier operation and all safety systems
- Modular cable design allows for single-cable replacement in the field

PRODUCT DETAILS

- Model #: VA-NET-300
- Spans Available: 29'-3" to 80'-0"
- Power Supply: 120VAC power; optional battery backup

WHY BARRIER 1?

Core Competencies:

Barrier1 designs and manufactures crash-rated vehicle barriers that protect people, property, and critical infrastructure. Our solutions are engineered to stop vehicle-based threats while maintaining site functionality. Trusted across airports, military bases, stadiums, government buildings, data centers, and power plants, Barrier1 delivers proven perimeter protection.

What We Offer:

- Certified anti-ram barriers (ASTM F2656 & F3016)
- Shallow- and deep-mount options
- Temporary, removable, and permanent solutions
- Custom engineering and manufacturing
- Decorative covers and finishes for visual integration
