

TRITON M30 MANUAL RETRACTABLE BOLLARDS

FEATURES

- Certified to stop a 15,000 lb vehicle at 30 mph (ASTM F2656-M30-P1)
- Ideal for storefronts, office buildings, pedestrian zones, stadiums, schools, and municipal sites
- Can be locked in either position to control traffic flow
- Retracts fully into the foundation and sits flush with the pavement when lowered
- Eliminates manpower, equipment, and time required for removable bollards
- Easy to install along turns and grade elevation changes
- Traffic-rated for heavy truck loads
- Provides bi-directional stopping capability
- Available in a stainless steel finish

TRITON M30 MANUAL RETRACTABLE BOLLARDS

TYPICAL SINGLE BOLLARD INSTALLATION

WHY BARRIER 1?

Core Competencies:

Barrier1 designs and manufactures crash-rated vehicle barriers that protect people, property, and critical infrastructure. Our solutions are engineered to stop vehicle-based threats while maintaining site functionality. Trusted across airports, military bases, stadiums, government buildings, data centers, and power plants, Barrier1 delivers proven perimeter protection.

What We Offer:

- Certified anti-ram barriers (ASTM F2656 & F3016)
- Shallow- and deep-mount options
- Temporary, removable, and permanent solutions
- Custom engineering and manufacturing
- Decorative covers and finishes for visual integration
