

Product Specifications

Talon M40 Super Shallow Foundation Bollards (Model SSB-800)

1. Crash tested and certified with ASTM M40/K8 (P1) rating.
2. Stops 15,000 lbs. vehicle at 40 MPH impact. Bi-directional stopping capability.
3. Requires only 4" excavation depth. Ideal for parking decks, basements, subways, or tunnels.
4. Prefabricated units allow for quick installation and reduced labor time on site.
5. Engineered to maintain structural integrity without dependency on surrounding pavement or foundation reinforcement.
6. No tying, bolting, welding, assembly, or specialty subgrade required; allows for field adjustments.
7. Easy to install with turns and across grade elevation changes.
